

2200Lite standard accessories

B type unit

It allows deeper penetration into body tissues for focused irradiation into deep tissues.

C type unit

This can be used for wider lesions.

Fiber-optic light guide

Standard fiber with a convenient light (1.5m/2.5m).

Carrying case

Useful carrying case when making house calls.

Wagon

Compact wagon with big drawer easy to mobile.

Specifications

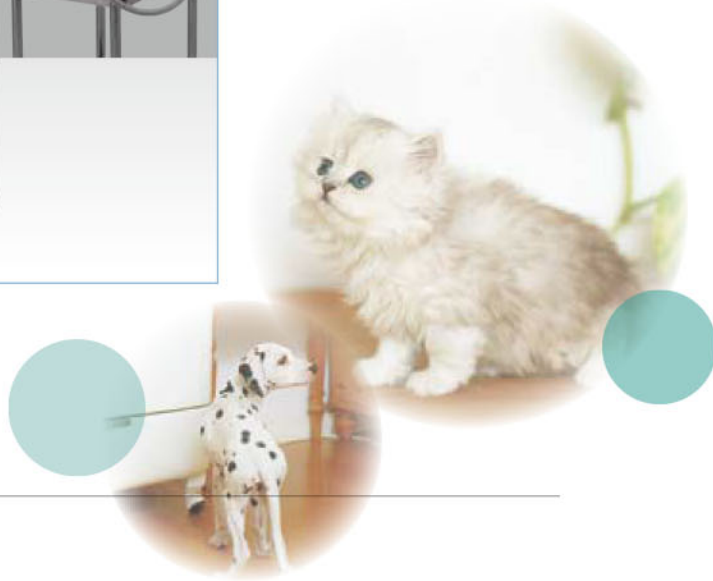

Rated voltage	: AC 100-240V
Power frequency	: 50/60Hz
Power consumption	: 220VA
Timer function	: 1-20min
Wavelength range of light output	: 0.6-1.8μm
Light source	: Super iodine lamp
Dimension of main body (without protruding parts)	: W245 x D387 x H160mm / Weight 4.6kg

Linearly polarized light Near-infrared device.

—SUPER LIZER—

2200 Lite

Enhanced power has advanced light irradiation treatment into a new realm veterinary medicine.

Pain-free light irradiation therapy for treating delicate animals.

Superlizer 2200Lite is a phototherapy device capable of near-infrared focused irradiation with a wavelength (0.6-1.6um) that penetrates the most deeply into tissues of all phototherapy devices with a high power of 2.200mw.

Super Lizer has widely been used in more than 20,000 domestic and overseas facilities for human medical treatment. Now with further increased power, it opens new possibilities for veterinary medicine.

Function

- Skeletal system disease** Chronic pain, Arthritis, etc.
- Skin disease** Chronic dermatitis, Trauma, Alopecia, etc
- Others** Autonomic nervous disease, Neurological disorder, Digestive system disease, etc.

Linearly polarized light Near-infrared device.

-SUPER LIZER-
2200 Lite

Deeper penetration into body tissues enabled by high output power with a maximum of 2,200mW. Comfortable warm feeling that no previous low-power lasers have ever provided Safe treatment with few side effects and complications. Space-saving compact design simple operation with user-friendly LED display and buttons.
